## Q1 METRICS OVERVIEW

### PATIENT HEALTH & DEMOGRAPHIC TRENDS

## DATASOURCES

HELLO!

I'm Prayuja Teli  
DATA ANALYST

USECASE

DASHBOARD: METRICS,  
PATIENT HEALTH/DEMOGRAPHICS WITH HOSPITAL METRICS

Combining in-house patient data and external hospital readmission data will allow us to gain..

MEDICA GENERAL HOSPITAL NETWORK

PATIENT DATA

The Centers for Medicare and Medicaid Services penalizes hospitals that have an excess of readmissions within 30 days of discharge for specific diagnoses. To achieve our mission statement, "...to achieve excellent patient care and satisfaction", and to have a minimal pat..

CENTERS FOR MEDICARE & MEDICAID SERVICES

HOSPITAL READMISSION REDUCTION PROGRAM

The Centers for Medicare and Medicaid Services collects and publishes data from all hospitals nationwide. The data allows patients, physicians, and hospitals to inform themselves on the quality of care offered in each hospital around the country by measuring the amount of read..

|                      | 50%                     | 37.12%                   | 39.11%            | 16.82%             | 16.87%                  | 35.79%                   | 37.25%            | 16.90%             | 16.42%                  | 37.23%                   | 38.46%            | 16.95%             | 16.61%                  | 35.71%                   | 37.97%            | 16.00%             | 16.29% |
|                      | Q1 2023, Medica General | Expected, Medica General | Q1 2023, CMS Comp | Expected, CMS Comp | Q1 2023, Medica General | Expected, Medica General | Q1 2023, CMS Comp | Expected, CMS Comp | Q1 2023, Medica General | Expected, Medica General | Q1 2023, CMS Comp | Expected, CMS Comp | Q1 2023, Medica General | Expected, Medica General | Q1 2023, CMS Comp | Expected, CMS Comp |        |

NOTE: Values for *Expected, Medica General* are the predicted readmissions using data from previous quarters on a logistic regression model.

## PERFORMANCE METRICS

## METRIC CALCULATIONS

Performance Variance (Variance):

$Expected\ Readmission\ Rate - Readmission\ Rate$

NTC (Network-to-Comp) Score:

..

## KEY POINTS

- Overall, the performance variance was better than predicted. However, it was a negligible increase at 1.68%.
- Three of four regions performed better than expected, with an NTC Score less than the projected NTCE Score.
- ..

## ACTIONABLE INSIGHTS

- Investigate the factors contributing to the Northeast's strong performance by analyzing the strategies, practices, or market conditions that led to the Northeast achieving the highest NTC score.
- Identify areas for improvement in the South by examining the factors contributing to the South's worst performance variance and highest readmission rate...
